

# INNOSMART® Liquid Handling Systems

## INNOSMART® D8

**VEL-BP-001013**

The INNOSMART® D8 is a fully automated 8-channel liquid handling workstation designed for high throughput, precision, flexibility, and cost-effectiveness. Experience unparalleled speed and functionality with flexible dual 4-channel pipetting modules and 360° operation dual robotic grippers.

**APPLICATIONS:**

- NGS Library Construction
- PCR Reaction System
- Prep/Enzyme Immunoassay
- Protein Antibody Expression
- Protein Purification & Screening
- And Much More!

## INNOSMART® SFS

**VEL-BP-001006**

The INNOSMART® SFS is an intelligent fluid handling system that stands at the forefront of flexibility and modularity. What sets this fast liquid handler apart is its modular design, which allows users to customize and adapt the system to meet their specific needs and workflows.

**APPLICATIONS:**

- Cell Solution Distribution
- Flask Feeding
- Culture Medium Distribution
- And Much More!

Ships from MA USA

## INNOSMART® MFS

**VEL-BP-001008**

The INNOSMART® MFS is a full-function system of sample preparation and in-process analytics. It offers process libraries of gene synthesis, gene analytics, transfection, cell culture, purification, LC-MS sample preparation, compound synthesis, compound screening, and more.

**APPLICATIONS:**

- Microbial Screening & Construction
- PCR Construction/ELISA
- R & D of Pharmaceuticals
- Sample Prep & Analysis
- In Vitro Efficacy Evaluation
- And Much More!
